4. Advisory Commentary

Portfolio Advisory

The portfolio enters this week with a moderately constructive but cautious posture, consistent with the macro backdrop of a CAPE at 34.8 and a Fear and Greed reading of 58. At this valuation level, the CAPE-adjusted equity risk premium implies forward returns below historical averages, and the portfolio's factor model expected returns already reflect this compression through the blended ERP calculation. AAI sentiment shows a modest bull-bear spread of 6.2% - not extreme in either direction - suggesting the market is not pricing in either euphoria or crisis, which is broadly neutral for near-term positioning. The single most actionable signal this week is GOOGL, where sentiment and valuation are aligned - a PEG of 1.2, four consecutive EPS beats averaging 14.5% surprise, and positive coverage across multiple credible sources all support a higher allocation. Max Sharpe recommends increasing GOOGL to 18.3%, and this is the clearest high-conviction call in the portfolio. The complication is that Min Variance and Risk Parity both recommend reducing GOOGL due to its higher standalone volatility of 25.8%, illustrating the tension between return-seeking and risk-minimising frameworks for a volatile but well-positioned stock. TD.TO presents the most interesting conflict: the valuation case is compelling at 10.2x forward P/E and EV/EBITDA well below the bank sector median, but two consecutive EPS misses and ongoing US regulatory overhang have suppressed the BL confidence score to 2 out of 5. This is a classic cheap-for-a-reason situation - the recommended posture is to hold current weight and revisit when the regulatory picture clarifies, rather than adding on valuation alone. Of the five strategies, Robust Mean-Variance offers the most balanced risk-adjusted profile this week - it captures the GOOGL and MSFT upside while maintaining meaningful diversification through TD.TO and XEQT.TO, and its VaR of \$1,140 CAD is the lowest among the return-seeking strategies. This is the recommended strategy for investors who want to act on this week's signals without concentrating in the highest-volatility names.

5. Model Outputs Per Asset

AAPL - Technology | Consumer Electronics

Factor Model

Alpha (daily)	0.000182
Beta MKT	1.210
Beta SMB	-0.180
Beta HML	-0.420
R ²	0.680
p-val alpha	0.031
Mu (annual)	9.20%

GARCH(1,1)

Persistence	0.9830
Long-run vol	22.80%
Current vol (ann)	24.10%
Vol regime	elevated

Black Litterman Views

Prior Return	0.0920
view Return	0.0180
Confidence	***
Conflict	True
Sentiment	positive
Valuation Signal	expensive

Reasoning

Sentiment is positive on services momentum but forward P/E of 28.4x and PEG of 2.8 suggest the market has priced in the optimism. Moderately positive view with reduced confidence given valuation stretch.

AAPL - Monte Carlo Simulation

Current Price	\$189.50	Posterior Mu	9.60%	Sigma (annual)	24.10%
Median S_T	\$206.25	VaR 95%	\$57.62	P(Profit)	38.0%

AAPL — 1-Year Monte Carlo Simulation

AAPL — Terminal Price Distribution

MSFT - Technology | Software

Factor Model

Alpha (daily)	0.000241
Beta MKT	1.150
Beta SMB	-0.220
Beta HML	-0.510
R²	0.710
p-val alpha	0.018
Mu (annual)	10.80%

GARCH(1,1)

Persistence	0.9790
Long-run vol	19.80%
Current vol (ann)	21.90%
Vol regime	elevated

Black Litterman Views

Prior Return	0.1080
view Return	0.0310
Confidence	****
Conflict	True
Sentiment	positive
Valuation Signal	expensive

Reasoning

Azure re-acceleration and Copilot traction are compelling catalysts. Valuation is elevated but justified by superior growth and margin profile. Strong confidence in positive view despite premium multiple.

MSFT - Monte Carlo Simulation

Current Price	\$415.20	Posterior Mu	11.80%	Sigma (annual)	21.90%
Median S_T	\$450.76	VaR 95%	\$92.74	P(Profit)	39.0%

TD.TO - Financials | Banks

Factor Model

Alpha (daily)	-0.000041
Beta MKT	0.880
Beta SMB	0.140
Beta HML	0.620
R ²	0.550
p-val alpha	0.412
Mu (annual)	6.10%

GARCH(1,1)

Persistence	0.9600
Long-run vol	18.20%
Current vol (ann)	18.10%
Vol regime	normal

Black Litterman Views

Prior Return	0.0610
view Return	-0.0180
Confidence	**
Conflict	True
Sentiment	negative
Valuation Signal	cheap

Reasoning

Sentiment is cautious on US regulatory overhang and recent EPS misses. However P/E of 10.2x and EV/EBITDA well below bank sector median suggest valuation has overshot to the downside. Conflict between cheap valuation and negative near-term sentiment.

TD.TO - Monte Carlo Simulation

Current Price	\$81.40	Posterior Mu	5.20%	Sigma (annual)	18.10%
Median S_T	\$84.45	VaR 95%	\$17.03	P(Profit)	41.0%

TD.TO — 1-Year Monte Carlo Simulation

XEQT.TO - N/A | ETF

Factor Model

Alpha (daily)	0.000012
Beta MKT	0.950
Beta SMB	0.080
Beta HML	0.110
R ²	0.920
p-val alpha	0.721
Mu (annual)	7.20%

GARCH(1,1)

Persistence	0.9770
Long-run vol	14.80%
Current vol (ann)	14.90%
Vol regime	elevated

Black Litterman Views

Prior Return	0.0720
view Return	0.0050
Confidence	*
Conflict	False
Sentiment	neutral
Valuation Signal	neutral

Reasoning

Broad market ETF with no company-specific view. Macro environment modestly constructive. Minimal view applied given CAPE of 34.8 suggesting index-level overvaluation.

XEQT.TO - Monte Carlo Simulation

Current Price	\$27.50	Posterior Mu	7.40%	Sigma (annual)	14.90%
Median S_T	\$29.78	VaR 95%	\$4.14	P(Profit)	33.0%

GOOGL - Communication Services | Internet Content

Factor Model

Alpha (daily)	0.000158
Beta MKT	1.180
Beta SMB	-0.150
Beta HML	-0.380
R²	0.640
p-val alpha	0.044
Mu (annual)	8.50%

GARCH(1,1)

Persistence	0.9690
Long-run vol	25.10%
Current vol (ann)	25.80%
Vol regime	normal

Black Litterman Views

Prior Return	0.0850
view Return	0.0280
Confidence	****
Conflict	False
Sentiment	positive
Valuation Signal	neutral

Reasoning

Search resilience and YouTube recovery are well-documented across multiple credible sources. PEG of 1.2 is attractive for a company growing earnings at this rate. Sentiment and valuation aligned - high confidence positive view.

GOOGL - Monte Carlo Simulation

Current Price	\$175.30	Posterior Mu	10.20%	Sigma (annual)	25.80%
Median S_T	\$184.37	VaR 95%	\$49.75	P(Profit)	37.0%
